

I am an XM SUBSCRIBER, I don't use the instant traffic & weather channels ever, but if I chose to, sense I pay for a service I would hope I could. Local broadcast doesn't have near the variety of channels as I get on my XM, no where near the sound quality, and too many commercials. Do not penalize XM for putting out a better service for the consumer. A service that someone has to pay for, it's not like it is given to us for free.
